The purpose of art is not a rarified, intellectual distillate— It is life, intensified, brilliant life. • love (99543) • hope (18206) • faith (18118) • truth (24257) • life (78243) • death (20307) • success (13855) The final phase of XLVII is characterized by a new sense of self marked by increased autonomy, resilience, expectancy, and excitement — as well as by the capacity to make and execute concrete creative plans. A positive process is both painful and exhilarating.

some time, life is alright. That

A person wearing a blue hoodie and plaid pants is holding a large, crumpled blue bag. In the background, another person is visible, holding up a smartphone to take a picture. The scene appears to be indoors, possibly in a store or a public space.
